DETAILED ACTION

Allowable Subject Matter

1. An "Amendment" was received on March 17, 2005, in response to Office Action of December 15, 2004. Claims 16 and 19 have been amended, as indicated.
2. Claims 1-28 are allowed.
3. The following is an examiner's statement of reasons for allowance: ✓
4. With respect to independent claims 1 and 21, prior art fails to disclose in combination with other recited limitations of the claims, method and apparatus for improving filtering action of a quadrupole mass filter by reducing a precursor fault caused by an asymmetric electrical field between a pair of opposing electrode rods in a y-axis of the quadrupole mass filter. Processing means for processing detector data determine the filtering action of the quadrupole mass filter by checking for a precursor fault. If a precursor fault is detected then power supply control means introduce an AC potential difference across the electrode rods in the y-axis in order to reduce asymmetry in the electrical field in the y-axis.

Claims 2-20 and 22-28 are allowed by virtue of their dependencies on the independent claims 1 and 21.

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
